4. First aid measures

General information: In case of accident or if you feel unwell, seek medical advice immediately.

In case of inhalation: Move victim to fresh air. If breathing becomes irregular or ceases, apply rescue breathing or artificial respiration immediately, where required supply oxygen.
Seek medical aid in case of troubles.

Following skin contact: After contact with skin, wash immediately with soap and plenty of water.
Cover frostbitten skin with sterile tissue.
Seek medical aid in case of troubles.

After eye contact: Immediately flush eyes with plenty of flowing water for 10 to 15 minutes holding eyelids apart.
Seek medical attention if irritation persists.

Most important symptoms/effects, acute and delayed

In case of inhalation: Vapors may cause drowsiness and dizziness.
In high concentration the gas may cause a suffocation.
After contact with skin: Propellent:
Contact with the product can cause cold burns or frostbite.

Information to physician

Treat symptomatically.

5. Fire fighting measures

Flash point/flash point range:
(n-Butane) -76 °F

Auto-ignition temperature: No data available

Suitable extinguishing media:
Water spray jet, foam, carbon dioxide

Extinguishing media which must not be used for safety reasons:
Full water jet

Specific hazards arising from the chemical

Extremely flammable aerosol.
In case of fire may be liberated: silicon dioxide, carbon monoxide and carbon dioxide.

Protective equipment and precautions for firefighters:
Wear self-contained breathing apparatus.

Additional information: Heating causes rise in pressure with risk of bursting.
Fight fire from a safe distance.
Cool endangered containers with water spray and, if possible, remove from danger zone.

6. Accidental release measures

Personal precautions: Wear suitable protective clothing. Keep unprotected people away.
Do not breathe vapor or spray. Avoid contact with skin and eyes.
Be aware that gases can spread at ground level (heavier than air) and pay attention to the wind direction.
Remove all sources of ignition.

Environmental precautions:
Do not allow to enter soil, sewage, water bodies, lower level rooms or pits.
Gas/vapor is heavier than air and can accumulate in closed spaces, particularly on the ground/in lower lying areas.
Supress gases/vapours/mists with water spray jet.

Methods for clean-up: Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Provide adequate ventilation.
Special danger of slipping by leaking/spilling product.
Clean contaminated area with soap and water.

Additional information: Remove all sources of ignition.

7. Handling and storage

Handling

Advices on safe handling: Provide good ventilation and/or an exhaust system in the work area.
Keep away from sources of ignition - No smoking.
Do not breathe vapor or spray.
Do not spray in the eyes.

Precautions against fire and explosion:

Avoid heat to prevent pressure buildup. Air combined with vapors may form potentially explosive mixtures that are heavier than air.
Protect from direct exposure to sunlight and temperatures exceeding 122 °F.
Keep away from sources of ignition - No smoking.
Take precautionary measures against static discharges.
Do not open or incinerate, even when empty. Do not spray into flames or on incandescent objects.

Specific use(s): release agent and lubricating agent for for orthopedic procedures.

Storage

Requirements for storerooms and containers:

Keep container tightly closed in a cool, well-ventilated place.
Protect from heat and direct sunlight. Keep container dry.

Hints on joint storage: Keep away from combustible material. Keep away from combustible materials.

8. Exposure controls / personal protection
